MODELS

Diva COF
· 2 and 3 low groups
· 2 and 3 high groups

Diva LM
· 2 and 3 high groups

OPTION

BARISTA STEAM WAND:

Steam wand with temperature probe to heat and froth milk automatically at the desired temperature.

MILK PUMP:

An auxiliary pump to suck milk to the automatic milk frother, and dispense milk-based drinks with a perfect, consistent foam at the desired temperature.

ELECTRICAL HEATING FOR CUP WARMER:

Having 3 temperature settings, heat cups and serve drinks at the perfect temperature.

PERFECT POINT

Patent pending coffee infusion system to set the perfect temperature for each selection button of each group. Temperatures can be individually adjusted and controlled by display.
